Papua New Guinea in Kina (currency).

South Aust.: Figures shown relate solely to the Electricity Trust of S.A.

General: Figures for the Snowy Mountains Authority shown at the right of this table are included in the figures for N.S.W., Vic., and the A.C.T.

* Due to exclusion of Concessionaires in the West. Aust. figures for 1979-80 it was necessary to adjust their 1978-79 figures accordingly.

* Northern Territory—1977-78 figures excluded from overall Total as break up not available.

Note:—Queensland: In accordance with the cash system of accounting, depreciation is no longer used as an operating charge. Item 8.22 now includes an amount of \$107 372 163 being cash contribution to capital works for the year. Had depreciation been charged on the assets in service (excluding appliance trading) during the year, the charge would have been \$61 435 000.

South Aust: Figures shown relate solely to the Electricity Trust of S.A.

N.S.W.: The totals given for each year ended in December included figures of the Electricity Commission of N.S.W. and Eraring Power Company of N.S.W. Ltd., for the year ended on 30th June, in the following year.

General: Figures for the Snowy Mountains Authority shown at the right of this table are included in the figures for N.S.W., Vic., and the A.C.T.

Northern Territory — 1977-78 figures excluded from overall Total as break up not available.

Note:— Queensland: In accordance with the cash system of accounting, depreciation is no longer used as an operating charge. Item 8.22 now includes an amount of \$128,366,000 being cash contribution to capital works for the year. Had depreciation been charged on the assets in service (excluding appliance trading) during the year, the charge would have been \$77 651 000. This practice began in 1979/80.

South Australia: Figures shown relate solely to the Electricity Trust of S.A.

For the year ended 30 June, 1983, power stations were revalued at current replacement cost and depreciation has been calculated on the basis of the higher asset values. Previously a provision was made for the higher cost of future plant replacement but this item was not included in Table 8.

N.S.W.: The totals given for each year ended in December included figures of the Electricity Commission of N.S.W. and Eraring Power Company of N.S.W. Ltd., for the year ended on 30th June, in the following year.

General: Figures for the Snowy Mountains Authority shown at the right of this table are included in the figures for N.S.W., Vic., and the A.C.T.

											96.949 3.8	35.840 5.2

Note: Queensland: In accordance with the cash system of accounting, depreciation is no longer used as an operating charge. Item 8.2.2 now includes an amount of \$193.967 million being cash contribution to capital works for the year. Had depreciation been charged on the assets in service (excluding appliance trading) during the year, the charge would have been \$103.700 million. This practice began in 1979/80.

South Australia: Figures shown relate solely to Electricity Trust of S.A.

For the year ended 30 June, 1983, power stations were revalued at current replacement cost and depreciation has been calculated on the basis of the higher asset values. Previously a provision was made for the higher cost of future plant replacement but this item was not included in Table 8.

N.S.W.: The totals given for each year ended in December included figures of the Electricity Commission of N.S.W. and Eraring Power Company of N.S.W. Ltd., for the year ended on 30th June, in the following year.**General:** Figures for the Snowy Mountains Authority shown at the right of this table are included in the figures for N.S.W., Vic. and the A.C.T.

†Figures are in Kina.

*Revised Figure.

South Australia: Figures shown relate solely to Electricity Trust of S.A.

For the year ended 30 June, 1983, power stations were revalued at current replacement cost and depreciation has been calculated on the basis of the higher asset values. Previously a provision was made for the higher cost of future plant replacement but this item was not included in Table 8.

N.S.W.: The totals given for each year ended in December included figures of the Electricity Commission of N.S.W. and Eraring Power Company of N.S.W. Ltd., for the year ended on 30th June, in the following year.

General: Figures for the Snowy Mountains Authority shown at the right of this table are included in the figures for N.S.W., Vic. and the A.C.T.

†Figures are in Kina.

*These figures have been revised to only include expenditure relating to electricity in West. Aust. — the total figure has also been revised accordingly.

**Revised Figure.

Note: Queensland: In accordance with the cash system of accounting, depreciation is no longer used as an operating charge. Item 8.2.2 now includes an amount of \$252.900 million being cash contribution to capital works for the year. Had depreciation been charged on the assets in service (excluding appliance trading) during the year, the charge would have been \$173.004 million. This practice began in 1979/80.

7.3 includes income from industrial farm customers

Queensland \$53.954M
South Australia \$17.607M

South Australia \$17.60/MWh incl. gas

South Australia. Income now includes the class revenue from independent undertakings previously shown in 7.6.

⁷ Income, being from sales of electricity only, is not directly related to expenditure in Table 8.

[†]Figures are in Kina.

TABLE 8 – OPERATING EXPENDITURE

Note: Queensland: In accordance with the cash system of accounting, depreciation is no longer used as an operating charge. Item 8.2.2 now includes an amount of \$291.796 million being cash contribution to capital works for the year. Had depreciation been charged on the assets in service (excluding appliance trading) during the year, the charge would have been \$200.475 million. This practice began in 1979/80.

South Australia: Figures shown relate solely to Electricity Trust of SA

South Australia: Figures shown relate solely to Electricity Trust of S.A.
For the year ended 30 June, 1986, power stations were revalued at current replacement cost and depreciation has been calculated on the basis of the higher asset values. Previously a provision was made for the higher cost of future plant replacement but this item was not included in Table 8.

General: Figures for the Snowy Mountains Authority shown at the right of this table are included in the figures for N.S.W., Vic. and the A.C.T.

Figures are in Kina

*South Australian figures for 1986/87 in 8.2.2 include \$14.642M from the State Electricity Commission.

Note:

NSW: In accordance with the new Accounting Standards in NSW electricity supply industry, all the items listed below are accounted for in a different category and not included in any of the "Residential, Industrial, Traction and Public Lighting" classifications:

- | | | | |
|---|-------------------|---|--------------------|
| 1 | Institution | 2 | Process Heating |
| 3 | Irrigation | 4 | Commercial Cooking |
| 5 | Air Conditioning | 6 | Water Pumping |
| 7 | Space Heating etc | | |

These items which were included in the "industrial" classification until 1988 are now included in the "Not Classified" classification.

SA: Public lighting now includes "Night Sight" customers.

WA: Each block of flats treated as one customer (in the main).

ACT: Community and demand tariff groups have been reclassified as commercial customers.

NT: The number of public lighting customers has been adjusted from 5 to 17. Previously only the five major customers were reported, however it is more accurate to include minor local government areas.

Note:

NSW:

In accordance with the new Accounting Standards in N.S.W. electricity supply industry, all the items listed below are accounted for in a different category and not included in any of the "Residential, Industrial, Traction and Public lighting" classifications:

- | | |
|----------------------|----------------------|
| 1 Institution | 2 Process Heating |
| 3 Irrigation | 4 Commercial Cooking |
| 5 Air Conditioning | 6 Water Pumping |
| 7 Space Heating etc. | |

These items which were included in the "Industrial" classification until 1988 are now included in the "Not Classified" classification.

Note:

NSW:

1. Industrial customers include those under demand, time-of-day demand and industrial development tariffs.
2. Commercial customers include business off peak, general supply, Time-of-day general supply and other tariff customers.
3. In accordance with the new Accounting Standards in NSW electricity supply industry, all the items listed below are accounted for in a different category and not included in any of the "Residential, Industrial, Traction and Public Lighting" classifications:

- | | |
|----------------------|----------------------|
| 1 Institution | 2 Process Heating |
| 3 Irrigation | 4 Commercial Cooking |
| 5 Air Conditioning | 6 Water Pumping |
| 7 Space Heating etc. | |

These items which were included in the "industrial" classification until 1988 are now included in the "Not Classified" classification.
Public lighting now includes "Night Sight" customers.

Each block of flats treated as one customer (in the main).

Community and demand tariff groups have been reclassified as commercial customers.

Note:

NSW:

Electricity sales from Prospect Electricity to Sydney Electricity had been double counted for the last three years, therefore figures from 1991 to 1993 have been adjusted accordingly.

Code 6.1 Residential consumption includes rural customers, some of whom have commercial/industrial premises.

Code 6.6 See note under table 5.

QLD:

Code 6.7 Figures do not include internal usage by supply authorities or consumption on unread meters as at 30th June.

ACT:

Sales of Gladstone power station reduced the figure of total public consumption.

TAS:

Farm consumption has been allocated between residential and commercial; community and demand tariff groups have been reclassified as commercial customers.

In accordance with the most recent review, the Tasmanian data for the year 1991/92 have been amended as follows:

Residential = 1747.457 GWh; Commercial = 613.309 GWh; Total = 8244.651 GWh.

Note:

General:

NSW:

Income is limited to income from sales of electricity only and does not include electricity on unread meters at 30th June.

Electricity sales from Prospect Electricity to Sydney Electricity had been double counted for the last three years, therefore figures from 1991 to 1993 have been adjusted accordingly.

Code 7.6 See note under table 5.

TAS:

Includes estimated revenue from unread meters and discounts.

Code 7.7 Excludes other operating income from distributors and Pacific Power.

In accordance with the most recent review, the Tasmanian data for the year 1991/92 have been amended as follows:

Residential = \$152.007M; Commercial = \$79.310M; Industrial = \$181.128M; Total = \$416.505M.

ACT:

Figures for 1992/93 have been revised according to advice from the Australian Capital Territory Electricity and Water.

Note:

N.S.W.:

Code 7.6: See note under table 5. It includes estimated revenue from unread meters and discounts.

Code 7.4: Included under code 7.2.

Income from sector of commercial, industrial and traction can not be separated.

Represent income from sales of electricity through QTSC system only. It does not cover electricity consumed in the Boyne Smelter.

Income from sector of commercial, industrial and traction can not be separated.

Note:

General: Code 6.1: Consumption includes rural customers, some of whom have commercial/industrial premises.

NSW: Previous category "Not classified" is eliminated. Figures under such category have been integrated into residential and commercial categories.

VIC: Consumption figures have been revised for 1994/95. The revised figures are as follows: Residential: 8915; Commercial: 7875; Industrial: 15191; Traction: 283; and Public lighting: 247.

QLD: Figures for 1994 have been revised due to the correction of industrial consumption.

Electricity consumption by sector 1995-96

Forecast of electricity consumption by sector
